What is LMI?

LMI stands for **Labour Market Intelligence**

LMI provides the knowledge and understanding of how the labour market functions and is crucial for making sense of changing economic circumstances. It can also help when thinking about what the future might hold, so it can support career decision making.

The full presentation of the LMI for our area can be found [here](#).

What's It All About?

A web designer uses their creativity and technical skills to build or redesign a website. They are responsible for the design, layout and coding of the website, and must be able to picture how the site will look when the client or general public are using it, as well as understand how it will work and be maintained by employees.

Web designers work with their clients to create a wide variety of websites - from an online shopping website, to an interactive educational resource - just like U-Explore!

This role could be part of an exciting STEM (Science, Technology, Engineering and Maths) career.

Web designers have to be good at ICT. This is because they use their computing skills to design websites to meet the needs of all sorts of clients.

ICT is important for all members of a modern society for its use in the workplace, learning and everyday life.
